An **emergency action plan** (EAP) is a written document required by OSHA. The purpose of an EAP is to facilitate and organize employer and employee actions during workplace emergencies.

At a minimum, your EAP must include: Means of reporting fires and other emergencies, evacuation procedures and emergency escape route assignments, procedures for employees who remain to operate critical operations before they evacuate, accounting for all employees after an emergency evacuation has been completed, rescue and medical duties for employees performing them, names or job titles of persons who can be contacted. 7/17/17 posted
